Solar Energy Projects

Harvesting the Sun for Clean Energy

Our solar projects will harvest the sun to create a new source of clean, safe and reliable energy.

Active Solar Projects

Select a tab below to choose a location and view project details for that area.

[Mid Michigan](#)[Northern Michigan](#)[Southwest Michigan](#)

Caledonia Solar Project

Quick Facts

Location: Alcona County
Total Capacity: 117 Megawatts
Project Footprint: 1,200 acres
Start of Commercial Operation: 2029

Gustin Solar Project

Quick Facts

Location: Alcona
Total Capacity: 335 Megawatts
Project Footprint: 1,800 acres
Start of Commercial Operation: 2028

Logan Solar Project

Quick Facts

Location: Ogemaw County
Total Capacity: 145 Megawatts
Project Footprint: 1,500 acres

Munro Solar Project

Quick Facts

Location: Cheboygan County

Total Capacity: 92 Megawatts

Project Footprint: 1,800 acres

Start of Commercial Operation: TBD

Protecting the Public

All of our solar projects comply with or exceed generally accepted industry standards. Numerous studies on the impact of solar farms. They show no harm to public health, safety or welfare and minimal impact to the environment and local wildlife.

Answers About Landowners and Solar

What does this opportunity mean for Michigan's communities and landowners?

How much land is needed for solar and where are the best locations?

How does a solar array affect property values?

How does a solar project affect the land?

What's the impact on the environment and local wildlife?

How does a solar array impact my neighbors?

Will increased reliance on solar effect electric reliability?
